## Testament

I have been running the Knox scientific Hydrogen system for 13 months now, and what an improvement this has made. My fuel economy was 340km to 90lt of fuel on Unleaded, and on Gas it was 230km for 70lt of Gas. Now with running the hydrogen system I have been able to get an extra 20% from my tank of Unleaded and an extra 33% from Gas. Not only this, but power and torque have increased. For example running into town from Cooks Gap to Mudgee 30-35min there are a number of hills were I need to drop one or two gears. With the hydrogen system running I am able to stay in 5<sup>th</sup> gear with only dropping 5-8km in the climb, the things you notice straight away is that you don't need to use as much accelerator as before. This system us a must for anyone wanting to save \$\$\$ with getting better Fuel economy.

Owner: Brett Fisher  
Vehicle: 4.5lt Petrol 1999 Landcruiser  
Fuel Capacity: 90lt Unleaded / 70lt Gas  
Fuel type: LPG/Unleaded 98+
