

# Patent

 12 January 2018

**Notice of acceptance for your patent application**

Armour IP  
PO Box 3099  
Broadway Nedlands WA 6009  
Australia

Application number: 2012261768  
Applicant name: Gaven Knox  
Your reference: P2061AU01

Dear Applicant,

Your patent application has been examined and was accepted on 3 January 2018. The accepted specification incorporates the following amendments:

S104 amendments up to and including item number: 2

The total number of claims at acceptance has been reported as: 9

**What you need to do now**

- Check your details - attached to this letter are the details of your application at acceptance. Some of these details may be displayed on the Certificate of Grant. Please review your details to ensure that they are correct.

**What will happen next**

- An Invitation to Pay (ITP) the acceptance fee will be issued to you - this fee will include an additional component if the number of claims exceeds 20.
- Advertisement of acceptance - a notice of the acceptance will appear in the Supplement to the Australian Official Journal of Patents on 25 January 2018.

**Your progress**

- Filed: Application is filed
- Examination: Application is being examined
- Acceptance: Application is accepted before an opposition period ends (if applicable)
- Grant: Patent is granted (subject to any requirements)
- Continuation/Renewal: You may wish to maintain your patent (subject to applicable law)

## Your acceptance summary

**Standard patent details**

Patent number: 2012261768  
Title: Hydrogen Generation  
Your reference: P2061AU01  
Number of claims at acceptance: 9

**Applicant and inventor details**

Applicant name(s) and address(es) (as it will appear on certificate/s):  
Gaven Knox  
Inventor name(s): Knox, Gaven

**Agent details**

Agent Name: Armour IP  
Address for correspondence: PO Box 3099  
Broadway Nedlands WA 6009  
Australia  
Address for legal service: PO BOX 3099  
Broadway Nedlands WA 6009  
Australia

**Prior art details**

Prior art documents:  
WO 2011038432.A1

**Priority details**

Number	Date	Country
2011905248	16 December 2011	AU

**International classification**

C25B 1/06 (2006.01)

1. improve the thermal stability,
2. increase the gas production mass flow rate,
3. improve the Power supply efficiency and “longevity”,
4. stop electro-stripping of electrode,
5. make the systems more robust in off-road conditions,
6. Reduce current load on the engine,
7. make unit safer to make flashback resistant,
8. MIG weld electrodes to reduce cell resistance,
9. LASER weld Electrodes to further improve conductivity.
10. Laser welded steel and aluminum enclosure boxes more robust.
11. Specialist electrolyte development protect plates and greater gas production

**COMMON FAULTY “NEUTRAL PLATE Design” units are not and cannot be patented as they make Steam NOT Hydrogen. If you want Steam, Buy a KETTLE**

Patented Hydrogen fuel system was lodged 2012 and modified 15 times during the testing period
